## PROFILE

A Full-Stack Developer specializing in the Laravel ecosystem to build efficient, end-to-end web applications. Proven ability to translate complex business requirements into scalable technical solutions. Passionate about building **accessible and inclusive** digital experiences that solve real-world problems and drive operational efficiency.

- Core Competencies:** Backend Development (PHP, Laravel), API Design (RESTful), Database Architecture (MySQL), Frontend Integration (Next.js).

## TECHNICAL SKILLS

- Languages:** PHP, Python, JavaScript
- Backend:** Laravel, Flask, API Development, OOP Principles, MVC
- Frontend:** JavaScript, Next.js, HTML, CSS, AJAX
- Databases:** MySQL, PostgreSQL
- Tools & Design:** Git, Postman, UML, Blackbox Testing, Draw.io
- Deployment & Cloud:** Vercel

## EXPERIENCE

### Lead Full-Stack Developer | Freelance Project: "Rumah Anyaman"

(July 2025)

- Led the end-to-end development lifecycle, from coding the platform from scratch in native PHP to successfully deploying the live site on Niagahoster.
- Developed all core e-commerce features, including a shopping cart and a secure payment system with invoice printing, enabling a seamless transaction process.

### Backend Developer (Contributor) | Freelance Project: BHM Project

(Apr 2025 - May 2025)

- Contributed to the backend development of a Halal certification platform based on Laravel 11.
- Successfully engineered functional modules for 4 distinct user roles (Guest, Admin, LPK, CRM), significantly improving data management and user workflows.

### Lead Full-Stack Developer | Thesis Project: "FotoYuk"

(Jan 2024 - Oct 2024)

- Led the end-to-end development of a photo studio marketplace, from UI/UX design in Figma to a full-stack implementation using Laravel 10.
- Architected a comprehensive system, including a database schema with 26 relational tables and over 15 RESTful API endpoints.
- Developed a dynamic booking workflow using Javascript and AJAX, which successfully enhanced the user experience in service and package selection.

### Backend Developer | Freelance Project: "SIPINTAS-PLUS"

(Jul 2024 – Sep 2024)

- Led the backend architecture for a facility booking system, successfully digitizing a manual process to manage over 100 bookable assets.
- Implemented an automated, digitally signed loan letter generation feature that successfully cut administrative processing time by an estimated 70%

### AI Developer | Studi Independen Kampus Merdeka: AI4Jobs

(Sep 2023 – Jan 2024)

- Completed an intensive 900-hour certified AI program covering the end-to-end project lifecycle, developing several models for tasks including Natural Language Processing (chatbot) and predictive analytics.
- Collaborated within a team on the capstone project to develop and deploy a web-based pneumonia detection tool using Python and the Flask framework.

### Software Development Intern | DTI Andalas University

(Jan 2023 – Feb 2023)

- Collaborated within a 4-person team to develop a new module for the lecturer's academic mobile application using Kotlin.
- Successfully developed and implemented 3 key features (student list, details, and academic history), improving data accessibility for lecturers.

## EDUCATION & CERTIFICATIONS

### Andalas University | Bachelor of Information Systems (GPA: 3.81/4.00)

(Aug 2020 - Jan 2025)

- BNSP Certifications:** ICT Project Manager (2024), Database Administrator (2024)
